Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Leonardi (US Patent 5,819,827).

The device of Leonardi reads on the structural elements as defined by the claims including the tooth shank defining a projection (58) and the pocket defining a recess (68). Leonardi teaches in paragraph 2 of col. 5 that slot 68 of the pocket securely retain and automatically gauge tooth shank 22. Therefore, the examiner takes the position that the combination of tooth 22 and slot 68 will resist a torque applied to the cutting head and has a zero clearance snap fit. Further, the examiner considers the functional limitations of claims 6 and 7 to be inherent in the device of Leonardi.

Claims 1-9, 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Gati (US Patent 6,758,637).

The device of Gati reads on the structural elements as defined by the claims including a tooth (24 or 66) including a cutting head (48 or 52), shank (60 or 52),

Art Unit: 3725

a pocket (22 or fig. 5), tooth receiving slot (42, 45; fig. 2 or 40), the tooth shank defining one of a projection (62; fig. 2) and a recess (70; fig. 6a) and the pocket defines the other projection (fig. 5) and the recess (fig.1). Gati teaches that the surfaces of the pocket provides a clamping surface and therefore, the examiner takes the position that the fit between tooth 24 or 66 and pocket (22 or fig. 5) will resist a torque applied to the cutting head and a zero clearance fit. Further, the examiner considers the functional limitations of claims 6 and 7 to be inherent in the device of Leonardi.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 11 and 13 rejected under 35 U.S.C. 103(a) as being unpatentable over Leonardi (US Patent 5,819,827).

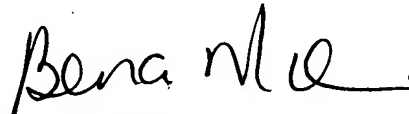

Leonardi teaches in the figures most of the elements of the claimed invention except for at least one of the flats defining the recess and the pocket defining the projection. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have at least one of the flats defining the recess and the pocket defining the projection, since it has been held that rearranging parts of an invention involves only routine skill in the art. In re Japikse, 86 USPQ 70.
